Allowable Subject Matter

The following is an examiner's statement of reasons for allowance:

The prior art of record does not disclose or suggest either in singularly or in combination the following limitations and other elements in the claims:

References Miller (US 3,803,489), Murakami et al. (US 6,501,101), and Endredi et al. (US 5,237,266) do not disclose:

- Equipping a C/V analyzer with a light-receiving-windowless electrolyte cell having an opening for electrolyte-wafer contact.

- Preparing a semiconductor wafer composed of an In-containing compound and superficially onto which at least one In-containing compound semiconductor layer has been heteroepitaxially grown.
- Employing applied voltages, including at least a maximum voltage that surpasses 10V, but is not greater than about 60V to profile the wafer's C/V characteristics.

Therefore, the above references do not disclose the claimed invention of present application and claims 2-5 and 14 are allowed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
